CHRISTINA VOLODINA

Web developer

Web developer. Fast, search-friendly, multilingual websites with motion that feels alive.

Open to jobs and freelance. I am a web developer who covers the whole path of a website: design, build, deployment and SEO tracking. I do not hand work over, I carry it to a measurable result. I build fast, search-friendly, multilingual sites with motion, and I work every day with AI tools such as Claude Code and GPT, with clear rules and a check on every step. A team gets more done in less time, without losing quality. I am open to a position inside a company or to freelance work, whichever fits.

LANGUAGES

Deutsch B1 · Українська · Русский

SKILLS

Fluid layout Mobile-first, fluid type and spacing with clamp(), CSS Grid and Flexbox, container-aware components.

Frontend Next.js App Router, React, TypeScript strict, CSS Modules. Server Components first.

Motion & WebGL GSAP, ScrollTrigger, Lenis, WebGL shaders, CSS 3D. Animation that serves the page.

SEO & GEO Technical and on-page SEO, Schema.org, hreflang, sitemaps, Core Web Vitals, AI-search readiness.

Multilingual sites Any language: DE, EN, UK and AR today, more on request. next-intl, locale routing, hreflang and full RTL layouts.

Accessibility Semantic HTML, keyboard and focus states, reduced motion, readable contrast.

Backend & security Service layers and repositories, zod validation, session and secrets handling, security headers, GDPR-minded data. Example: the ServiceOS SaaS.

AI-assisted dev Claude Code and GPT as a pair-programmer: rules, skills, MCP, small verified steps.

SEO

Technical SEO Crawlability, indexation, canonical URLs, robots, XML sitemaps, clean URL structure.

On-page SEO Unique titles and descriptions, heading hierarchy, internal links, alt texts, search intent.

Structured data Schema.org JSON-LD: Person, WebSite, Organization, LocalBusiness, FAQ, Breadcrumb.

International SEO Locale routing, hreflang with x-default, localized metadata, no duplicate-content traps.

Core Web Vitals LCP, CLS and INP: server-first rendering, optimized images, lean JavaScript.

GEO & AI search Answer-ready content, clear entities, llms.txt, crawlable text for AI assistants.

END TO END

Design I design the layout, type, palette and motion myself, and I test them on real devices before any code is final.

Build Next.js, TypeScript and CSS Modules, with i18n, accessibility and SEO built in from the first commit.

Deploy Vercel deployments, environment setup, security headers and domains, so the site goes live safely.

Track and improve I watch Search Console, Lighthouse and Web Vitals, then adjust titles, content and structure based on the data.

PROJECTS

Beauty Studio Beauty · Demo
Lashes, nails and hair. GSAP and Lenis motion, WhatsApp booking flow, DE / EN / UK.
Next.js 16 · GSAP · next-intl · WebGL

NØFORM Fashion · Concept
A cinematic brand site: scroll-driven scenes, canvas and WebGL, a sound toggle and a strict mono typographic system.
GSAP · ScrollTrigger · Observer · Canvas

Pizza & Döner Food delivery · Concept
A scroll storyboard where toppings lift and fall, a yufka rolls in and the box opens.
GSAP · Scroll storytelling · DE / EN / UK

Apartament Demo Furnished stays · Demo
Blueprint and pencil modes, localized routes, FAQ and blog structure, consent-first analytics.
Next.js 16 · next-intl · SEO · Blog

Billyard Games lounge · Concept
Pool, darts, shisha, cards and table football. A bold red and black identity with a sound toggle and DE / RU / EN.
Next.js 16 · GSAP · Three.js · DE / RU / EN

Detailing Car care · Concept
Paint correction and ceramic coating. A giant outlined headline behind the car, a process timeline, sound and a light and dark switch.
Next.js 16 · GSAP · Lenis · Light / dark

Premium Consulting Finance · Template
An editorial template for independent financial advice: oversized type, calm motion, German-market ready.
Next.js · Editorial · DSGVO-aware

Volodina Web Studio My studio
My own agency site: five languages, AI assistant widget, pricing calculator, blog and structured data.
Next.js · i18n · SEO · AI assistant

WORKING WITH AI

Rules first A CLAUDE.md per project: stack, security checklist, no push without approval, no invented data.

Map before editing Graphify builds a knowledge graph of the codebase, so large changes start from the architecture.

Skills and MCP UI/UX, motion and design-taste skills, plus MCP tools, applied where they fit.

Verify every step Build, lint and a real browser check before anything is committed. Commits only with my OK.
